

**PARCC Meeting Minutes**  
**May 22, 2018**  
**1:00pm - 3:00pm**  
**Lodi School District Office**

Members Present: Paula Enger (PARCC/LCAT); Lindsay Patterson (PARCC/LCAT); Tawsif Anam (State Rep/Ron Johnson); Andrea Drew (CC HHS); Heather Kierzek (Col Co Drug Court); Sara Shaver (Compass Counseling); Tiffany Thornton (Compass Counseling); Scott Klicko (Lodi PD); Ken Manthey (Portage PD); Devin Jones (Wilz Hometown Pharmacy Intern); Larry Crowley (Wilz Hometown Pharmacy); Amanda Riek (Public Defender); Deanna Lord (Sauk Prairie Healthcare); Nancy Long (Col Co Board); Tom Drury (Portage PFC); Stacy Davenport (CC HHS)

1. Minutes from last meeting approved
2. Introductions & Updates from the group
  - a. Paula - viewing of PARCC theater ad - will touch base with Susan Lorenz on her grant dollars as well for theater ads; MATRS - \$350,000 grant - to clarify, dollars not to support PARCC - PARCC has \$50,000 from PFS grant & about \$2,600 from AWY grant; money for prevention available through the Healthier Wisconsin Partnership Program, will just need help writing for this grant - if anyone can/is willing to help write it, please let Paula know!; 2 new DRE officers going through training (8 DRE officers now in Col Co & also now have 3 K9 units); has lock bags & boxes available - please just sign them out, so Paula can follow-up in terms of grant reporting - also going to work with Larry to offer lock boxes through Portage & Lodi pharmacies, but also looking to work with Stacy to get them out through ADRC as well; working on 3 travelling presentation containers (1 in each: table runner for event tables, easel & PARCC poster board, etc.) to help us stand out at events - please let Paula know if you find an event that PARCC could be represented at; in Lodi, working to put together a "Parent University" Day for elementary age parents, but could potentially be done countywide as well.
  - b. Scott - Lt. Brandner asked him to mention the Drug Overdose Death Review Team for the county; along with this, they are trying to put back together a countywide drug task force.
  - c. Nancy - CARES group talking about reaching out in schools - how to reach both parents & children - looking to partner with PARCC, idea of 3-O Day (out of Wood Co) with variety of topics for youth to attend regarding AODA issues.
    - i. Paula added: looking into this in terms of meeting youth on a countywide scale to try to set up county youth group.
  - d. Tom - recently did a presentation in school, family health class (~40 kids) went over pretty well.
    - i. Stacy added: great idea to reach out & present in health classes, because it's not really getting done currently.
    - ii. Sara added: in Portage, if you get a certain grade in Health class in 8th grade, then you don't have to take Health class in high school.

- e. Devin Jones - summer pharmacy intern with Hometown Pharmacy, working with Larry (welcome!); new drug recently passed by FDA that helps those detoxing from opioids - helps to decrease the painful withdrawal symptoms.
- f. Larry - possibilities for either initiating care or continuation of care (for Vivitrol) through collaborative practice agreements via healthcare teams; 1-time injection vs daily pills, also creating connections between pharmacy & patients; currently performing urinary analysis (7-panel screen) at pharmacies; through collaborative practice agreements, patient would be recommended through the physician that has signed agreement with the pharmacy - initial visit with physician & counselor to qualify for program, to make sure they're ready to handle this.
- g. Amanda - courthouse is moving back, by the start of June will be completely in new courthouse; Drug Court is being taken over by an attorney through Amanda's office; lock boxes & bags taken last time (4-5 of each) were gone almost immediately - almost all of those who took one either had pending drug cases or small children in the home; recently presented on addiction (breaking the stigma); faster access to attorneys - now as an office, the jail has agreed to let them in to do evaluations before bail hearings (~40% of people talked to - in jail for heroin related charges), more face-to-face access - also attorneys recently filed petition to raise reimbursement rate, and hopefully they can get more people attorneys quicker; may be more people getting out of jail sooner due to lack of representation - hoping it will amount to change in legislative policy for reimbursement rates.
- h. Tawsif - Right to Try legislation - in regards to terminally ill patients, Bill gives people hope - if it becomes law, will give people access to potentially life-saving care, granting access to new treatments that are not FDA approved (House currently voting on this Bill - expected to be signed by Trump if it passes).
  - i. **Update: this legislation has gone through and signed into law**
- i. Heather - now up to 10 participants in Drug Court, with probably another in the next few weeks; OWI Court - finally doing interviews; posed question: has Col. Co. ever done a youth summit? - noted in past, randomly selected students from each school district chosen to participate, and a youth group was born out of that event.
- j. Sara - mental health, looking to do telehealth - not much progress yet, still looking at companies with good reviews to move forward with on this - not wanting to be in competition with other organizations, and has talked to Clint about telepsychiatry; Sleep in Heavenly Peace - had over 40 people attend first informational meeting - making good progress with this project, as things are moving very quickly! - please keep ears & eyes open for any kids in need for these services - requests can be made via website; all donation based - money & supplies; first build day is July 6th, then delivering beds ideally 5-8 days after the build.
- k. Tiffany - Project HOPE co-facilitator - on week 6 of program; survey at beginning of program, structure changed up based on needs of participants (based primarily on opiate use, but not turning people away because also does work for alcohol abuse); 3-4 participants in pilot group - talks for future program needs, great potential to go further.

- I. Stacy - 2 referrals to MATRS program from Project HOPE; UW System granted Addiction Support Hotline (more information to come) - for prescribers to expand practice to help individuals with addiction needs; Stacy's grant can provide up to \$500 for participants to attend course on Wednesday, May 30th to provide Suboxone; MATRS grant needs more participants before end of June; Sauk Co is keeping crisis hotline, so looking for Plan B option for Col Co residents to access hotline; HHS moving buildings on 6/25, currently at capacity but needing more room for additional staff; need quality providers for all programs.
3. Action Teams:
  - a. Top 3 most time sensitive identified as: Safe Prescribing, OD Review Team & Grant Opportunities
  - b. Paula/Lindsay will be sending out the information on each committee, so the people who signed up for what they wanted to work on can begin thinking about that & may begin communicating on action steps moving forward with these projects. Also, those who may not have had a chance to sign up for one can come with something in mind to future meetings.
